Omega Securities Inc. Announces Price Change to Omega ATS

Omega Securities Inc. (OSI), the operator of Omega ATS, continuously strives to find new ways to aid subscribers and to reduce costs, while also being able to incite liquidity and further our excellent fill quality.

The Canadian market landscape has remained highly competitive in recent months, and so OSI has decided to implement a new pricing schedule on Omega ATS's inverted pricing. Keeping in mind the interests of traders and various marketplace participants, we feel that this new pricing will attract active flow while continuing to incent passive participants.

OLD			NEW		
	Active	Passive		Active	Passive
0 - 100MM	-\$0.0014/share	\$0.0019/share	0 - 100MM	-\$0.0016/share	\$0.0020/share
100MM - 200MM	-\$0.0014/share	\$0.0018/share	100MM - 200MM	-\$0.0016/share	\$0.0019/share
200MM +	-\$0.0014/share	\$0.0017/share	200MM +	-\$0.0016/share	\$0.0018/share

In making this change, OSI has chosen to compress the spread on all equities trading at or above one dollar. We believe these changes will have a positive impact on all Omega ATS trading participants.

These pricing changes will go in to effect on June 1, 2016.
