Omega Securities Inc. Announces Launch Date for Multicast Market Data Service

Omega Securities Inc. (OSI) is pleased to announce that its Multicast Market Data service is ready to launch. This new facility will be in OSI's production environment starting **April 24, 2017**.

Testing for this new market data facility is currently available in OSI's Global Test Environment in compliance with regulatory requirements. All Canadian trading participants, subscribers, and vendors currently have access to the GTE to test this new functionality.

We encourage all participants to consider migrating over to the new UDP services.

To inquire about configuring your network to receive our multicast broadcast, please contact operations at: operations@omegaats.com

For further information on Omega ATS & Lynx ATS please contact OSI at: info@omegaats.com
