

I would like to take this opportunity to provide an update on certain steps we have taken at Omega in response to the novel coronavirus (COVID-19) to safeguard the health, safety, and well being of our team and other critical operational measures to remain resilient and highly available to our subscribers.

We are ready to service your trading needs and have invoked our Business Continuity Plan (BCP). We have implemented a work from home schedule for members of our team. We are also implementing the following additional precautions at this time:

- We are enforcing non essential travel restrictions
- We have implemented enhanced visitor restrictions to our office location
- We have increased the frequency of our maintenance procedures to ensure systems resilience and added more capacity to our trading systems. Our Data Center Providers have also implemented their BCP plan and are on full standby for any issues if they arise
- We are constantly monitoring market conditions and government and world health web sites for updates and prepared to adapt as necessary
- We have asked that staff members who may become sick or display symptoms to refrain from work and are not permitted to return to work without physician's approval
- We will be adhering to all Government and World Health Organization quarantine recommendations for any staff who have traveled outside of Canada

The following members of the Omega executive team are to be contacted in case of an emergency.
